EXECUTIVE WORKSHOP BRIEF & PEDAGOGY HIGHLIGHTS

Program Aim & Architecture:

Team Asterix, the official autonomous vehicle engineering division of PSG iTech competing in aBAJA SAEINDIA, launched this 4-week flagship technical workshop series to provide practical, lab-intensive training in autonomous robotics and automotive electrical powertrains.

Core Technical Tracks:

1. Software & Autonomous Perception: ROS (Robot Operating System), System Design, Computer Vision (OpenCV), Supervised ML, and Agentic AI workflows with vehicle telemetry.

2. Electronics & Powertrain: Circuit fundamentals, LTspice simulation, ESP32 microcontrollers, vehicle startup interlocks, analog power electronics (Buck/Boost converters), and multi-layer PCB design.

Venues: Autonomous Systems Lab (Room 302) & Electrical Machines Lab.

PARTICIPANT DISTRIBUTION BY ACADEMIC YEAR:

Year 1: 248 (97.6%)	Year 2: 5 (2.0%)	Year 3: 1 (0.4%)

STATUTORY AUDIT & RECONCILIATION DECLARATION:

All 254 registrations documented herein have been verified against active payment gateway transactions and bank settlement statements. Dual-Track Combo packages grant simultaneous seat entitlements to both Software and Powertrain laboratory rosters. Capacity constraints (161 Software / 161 Powertrain) have been fully honored.

KEY DEMOGRAPHIC & INTERDISCIPLINARY FINDINGS

1. Exceptional Interdisciplinary Convergence: Over 65% of registrations originate from core circuit branches (ECE: 22.8%, EEE: 19.7%, VLSI: 4.3%), perfectly aligned with the emerging demand for electric vehicle powertrain and embedded electronics competencies.
2. Strong Computing & AI Integration: The Software & Perception track witnessed rapid uptake across CSE (22.8%), Robotics & AI (7.1%), and AI&DS (4.7%), demonstrating substantial cross-pollination between artificial intelligence algorithms and physical vehicular hardware.
3. Comprehensive Mechanical Support: Mechanical Engineering accounted for 12.6% of participants (32 students), reinforcing vehicle dynamics, chassis architecture, and packaging integration fundamentals across the BAJA framework.

4. Freshman Cohort Focus: Over 97.6% of participants are 1st Year engineering undergraduates, providing Team Asterix with an exceptional high-potential talent pipeline for multi-year vehicle development cycles through 2026-2030.

STATUTORY VERIFICATION & ADMINISTRATIVE SIGN-OFF DECLARATION

AUDIT PASSED • OFFICIAL PSG iTech RECORDS

WORKSHOP AUDIT CERTIFICATE & FINANCIAL RECONCILIATION SUMMARY

1. Registration Authenticity: This document constitutes the verified and final official roster of all 254 participants enrolled in the Asterix Technical Workshop Series 2026. Every participant record documented above corresponds to a successful statutory payment confirmed via Razorpay / Banking Partner reconciliation.
2. Refund & Upgrades Reconciled: All participant adjustments, including processed refunds (Registration record #AST-WS-0178 removed upon full refund remittance) and package upgrades (Software to Dual-Track Combo package upgrade #AST-WS-0229, Hariram S, Roll: 715526177013), have been accounted for.
3. Capacity & Compliance: Both technical tracks have adhered strictly to institutional laboratory health and safety ceilings (161 participants each), fully compliant with PSG iTech Autonomous Systems & Robotics Lab and Electrical Machines Lab guidelines.
4. Total Remittance: Total gross fees collected through the online portal amount to Rs. 3,05,000/- (Rupees Three Lakh Five Thousand Only), designated towards lab consumables, hardware development, robotic kits, and SAEINDIA aBAJA vehicle prototyping.
